next_hop(dst)
path to dst cached?
no
yes
Dijkstra from this node over the weighted graph: cost = 1 + 5(1-q) + 3f
dst = RESCUE__ ?
no
yes
target = dst
target = reachable node with role GATEWAY or RESCUE and least distance
target reachable?
no
yes
Rebuild path from predecessors Cache it for dst
No route: retain in store-and-forward
Return path[1] as the next hop
